### **Artist Statement**

Triptych (Greek adjective meaning "three-fold") is a form of art that is tied to Christian church history and architecture from the early Christian era onward. Triptychs were prominent panels atop altars in grand, glorious medieval cathedrals. One cannot see all of the imagery in a triptych in one glance. Rather, like a book, one opens it and looks inside. One enters into a world.

The scale of this triptych doesn't place it in a vaulted cathedral, but in a home. In the midst everyday life. Alongside carpooling and cooking, playing and exploring, mowing and gardening.

How does one's confession of Jesus as risen and reigning Lord of creation, the one who brings new creation, play out in this arena, the arena of one's everyday life?
